GARUDAN®

Customized Solutions

**Electronically controlled cylinder
bed pattern sewing machine
with sewing area 350 × 250 mm
for stitching of trouser legs**

Features and Benefits

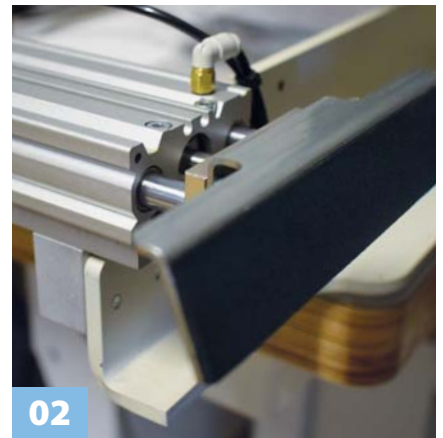

- Customized solution for stitching of trousers legs on Garudan programmable sewing machine
- The machine with long cylinder bed and pneumatic fixing of the material is designed for trendy decorative stitching or repairing on jeans and trousers, also suitable for other cylindrical shapes such as sleeves, cylinder filters, etc. Maximum sewing speed is 2.600 stitches / minute
- Easy conversion of cylinder design to standard flat bed pattern stitcher with independent right/left lift of the feed clamp brings multipurpose usage of the machine
- New patented design with special rolled ball screw mechanism eliminates disadvantages of standard machines with timing belts or linear ball screws
- Possibility of endless sewing with unlimited number of pattern cycles enables operator to sew a section of different patterns on one pair of jeans

01

Standard circumference of cylinder bed is 28 cm, however, the dimension can be modified by the user by easy exchange of upper clamp and cylinder bed - 3 sets of parts for different sizes of the trousers are standardly supplied with the machine

02

Integrated side holders for automatic movement of the material in both axes allow stitching to run along the circumference of the material and break the limit of maximum sewing area
